

Thunderbird – Zimbra Calander Integration

Open Calender on thunderbird and create new calander

The screenshot displays the Thunderbird email client's calendar interface. At the top, a toolbar includes buttons for 'Synchronize', 'Event', 'Task', 'Edit', and 'Delete'. Below this is a search bar labeled 'All Events' with a 'contain' filter and a search icon. A small calendar for December 2015 is visible on the left, with the 15th highlighted. The main calendar view is in 'Month' mode, showing a grid for December 2015. A context menu is open over the calendar, listing several actions: 'Show Home', 'Show Only Home', 'Show All Calendars', 'New Calendar...' (highlighted with an orange background and a mouse cursor), 'Delete Calendar...', 'Export Calendar...', 'Publish Calendar...', 'Synchronize Calendars', and 'Properties'. The bottom status bar indicates 'No messages to download' and shows the 'Today Pane' and 'Tz Status'.

Save the Name as desired

The image shows a 'Create New Calendar' dialog box with a title bar containing standard Mac OS window controls (close, minimize, maximize). The main content area is titled 'Create a new calendar' and 'Customize your calendar'. It includes a descriptive sentence: 'You can give your calendar a nickname and colorize the events from this calendar.' Below this, there are four fields: 'Name:' with the text 'zimbra-mycal', 'Color:' with a blue color swatch, 'Show Reminders:' with a checked checkbox, and 'E-Mail:' with a dropdown menu showing 'Biswajit Banerjee <biswajit@tetrain.com>'. At the bottom, there are three buttons: 'Cancel', 'Back', and 'Next'.
